PROFESSIONAL SUMMARY

Final-year Information Technology undergraduate at Sri Lanka Institute of Information Technology (SLIIT), with practical experience contributing to backend API development, web application development, and software project collaboration. Familiar with Java, Spring Boot, React.js, JavaScript, MySQL, and MongoDB. Contributed to an e-channeling platform, a restaurant POS system, and web-based management applications. Interested in building reliable, user-focused software and growing as a Software Engineer or Full-Stack Developer.

SKILLS

Programming: Java, JavaScript, HTML, CSS

Frameworks & Libraries: Spring Boot, React.js

Databases: MySQL, MongoDB

API Development & Testing: REST APIs, Postman

Developer Tools: VS Code, MySQL Workbench, GitHub

Additional: Debugging, exception handling, UI/UX design, Figma, Adobe XD

EXPERIENCE

Software Intern | Sri Lanka Telecom (SLT)

October 2025–April 2026

Backend Development — E-Channeling System

• Contributed to REST API development for user management, authentication, and service-related workflows.

• Worked on backend logic and integration between application components; tested and debugged API functionality.

Backend Development & Project Coordination — Restaurant POS System

• Contributed to backend APIs supporting order processing, inventory management, and system workflows.

• Coordinated team tasks and supported integration between frontend and backend components.

UI/UX Design — Galaxy Connect

• Created wireframes, prototypes, and high-fidelity interface designs focused on usability and visual consistency.

• Collaborated with developers to support implementation of interface designs.

SELECTED PROJECTS

Home Inventory Management System | MERN Stack | Collaborative

• Developed features for managing household grocery items through manual entry or voice input.

• Included expiry alerts, low-stock notifications, and reporting for usage, expenses, and remaining stock.

Fuel Station Management System | MERN Stack | Collaborative

• Built features for tracking fuel and related station inventory, with low-stock alerts and operational reports.

• Supported monitoring of expenses, income, and remaining fuel.

Link: github.com/Ahamed-Rahman/ZenoFuelStation_ITP

Online Hotel Reservation System | Java, JavaScript, HTML, CSS

• Developed a web application for browsing hotel options and booking rooms based on guests, room, and meal preferences.

• Included administrative functions for reservation monitoring and monthly income reports.

Smart Schooler | HTML, CSS, Java, JavaScript | Collaborative

• Contributed to a learning application where users can share achievements and create personalized learning plans.

• Features include posting, reposting, liking, commenting, and organizing learning activities.

EDUCATION

BSc (Hons) Information Technology — Sri Lanka Institute of Information Technology (SLIIT)

2023–Present | 4th Year | Colombo, Sri Lanka

Advanced Level — Physical Science — Ranabima Royal College

2018–2020 | Kandy, Sri Lanka

Ordinary Level — Ranabima Royal College

2017 | Kandy, Sri Lanka

CERTIFICATIONS

• Comprehensive UI/UX Design — FSD Academy

• Principles for UX Design — LinkedIn

• UX Foundations: Research — LinkedIn

• Using AI Tools for UX Design — LinkedIn

• Using AI for UX Design and Research — LinkedIn

• Learning Spring 6 with Spring Boot 3

• Introduction to HTML5 — Coursera

• Programming for Everybody (Getting Started with Python) Coursera
